

Aman Naveed

BS Software Engineering Student
University of Management and Technology (UMT)

Professional Summary

Motivated Software Engineering student currently studying in the 6th semester at UMT. Possesses knowledge of programming, software development, databases, data structures, and Natural Language Processing. Passionate about learning new technologies and building software solutions.

Education

Bachelor of Science in Software Engineering
University of Management and Technology (UMT)
Current Semester: 6th

Technical Skills

Programming Languages:

- C++
- Python
- Java

Academic Areas:

- Programming Fundamentals (PF)
- Object-Oriented Programming (OOP)
- Database Systems
- Data Structures and Algorithms (DSA)
- Natural Language Processing (NLP)

Academic Projects

1. Chatbot

Developed a basic chatbot capable of answering user queries.

2. Student Management System

Created a system to manage student information and records.

3. Basic Calculator

Built a calculator application for arithmetic operations.

4. Library Management System

Designed a system for managing books and library records.

5. Election System

Developed a simple voting and election management application.

Interests

Artificial Intelligence, Software Development, Natural Language Processing, Database Management, and Problem Solving.
